

My Friend is in Love with You

By Scottyji

I have a friend who is in love with you
Unfortunately,
He's no longer here
But fortunately, that's not entirely true
If you Google
Hafiz

You can still go out on a date
Especially if you are feeling down
Just Google

"We Should Talk About This Problem"
& my friend will immediately
infuse your heart
with love

I wonder
1000 years from now
What will Google know then?
This much for sure
My friend will still be in love
with you!
